

Direct Energy Business proudly recognizes

Bindi North America

for outstanding leadership in addressing climate change through their purchase of 3,778 MWhs of renewable energy attributes. This purchase will offset 100 % of their energy consumption and support the growth of renewable energy generation projects.

Through the Green-e® Energy program, the Center for Resource Solutions certifies renewable energy that meets the highest standards in North America: it must be generated from new facilities, marketed with complete transparency and accuracy, and delivered to the purchaser. Green-e staff verifies the entire chain of custody of certified renewable energy, from generation to retirement, to ensure that individuals and businesses are getting exactly what they paid for. www.green-e.org.
